

Product Group MFSZ

Machine feet made of zinced steel base with vulcanised rubber pad

Material

- Base body: zinc-plated steel
- Rubber: NBR 80 Shore, vulcanized

Product information

- The machine foot is a combination of balancing function and vibration damping.
- The foot consists of a metal plate that has been pressed into a mould. The vibration-damping rubber is vulcanised into the resulting recess.
- The machine foot can compensate for uneven floors up to 10°.
- The load capacity of the screw (buckling length!) may be less than indicated in the table.
