

Product Group MFTP

Machine feet made of stainless steel with sealing bush, fixing holes and vulcanised rubber pad

Material

- Base body: AISI 304 (A2)
- Rubber: NBR 80 Shore, vulcanized

Product information

- The machine base has a sealing bush that covers parts of the thread. An O-ring is incorporated inside the bush. The sealing ring prevents the penetration of dirt by mechanically sticking to the thread surface. Thus the strictest legal hygiene standards are fulfilled.
- Die abgerundete Form und der verdeckte Übergang vom Fuß zum Gewinde erleichtern die Reinigung.
- The vulcanized rubber mounting surface can be drilled through and screwed to the floor.
- Depending on the foot diameter the machine foot has two or four fixing holes.
- The machine foot can compensate for uneven floors up to 8°.
- The load capacity of the screw (buckling length!) may be less than indicated in the table.
- Character dimension "L2" corresponds to the maximum usable stroke in mm.
- Especially suitable for tanks and cisterns, also for the beverage industry, chemical industry
